DETAILED ACTION

Specification

A substitute specification in proper idiomatic English and in compliance with 37 CFR 1.52(a) and (b) is required. The substitute specification filed must be accompanied by a statement that it contains no new matter.

The disclosure is objected to because of the following informalities: it is not clear what a "fillister" found through the specification. Further, the title of the invention is misdescriptive. Examiner suggest "Retractable Cleat".

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1, line 8, "a driving plate sited in the receiving cavity" is vague and indefinite. Examiner suggest replacing "sited" with - - seated - -. Claim 1, line 14, "the central line" lacks antecedent basis. Examiner suggest "a longitudinal axis thereof". Claim 1, lines 18-24 makes no sense. Claim 7, it is not clear what the term "fillister" means.

Claims 1-8 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Morris et al'849, Hirakui et al, Morris'566, Gross, German patent, Czipri, Lo, and Harris'388 show cleats of similar type but does not show the coupling member is fixedly fastened to the movable handle and having another side disposed in the longitudinal track of the driving plate to move the coupling member to the V-shaped position section and V-shaped guiding section the tips of which extend toward the interior of the track.
